CWA XXXX1

WORKSHOP

July 2012

AGREEMENT

ICS 03.100.10; 35.240.60

DRAFT

English version

Business Interoperability Interfaces for Public procurement in Europe – Tender Notification

This CEN Workshop Agreement has been drafted and approved by a Workshop of representatives of interested parties, the constitution of which is indicated in the foreword of this Workshop Agreement.

The formal process followed by the Workshop in the development of this Workshop Agreement has been endorsed by the National Members of CEN but neither the National Members of CEN nor the CEN Management Centre can be held accountable for the technical content of this CEN Workshop Agreement or possible conflicts with standards or legislation.

This CEN Workshop Agreement can in no way be held as being an official standard developed by CEN and its Members.

This CEN Workshop Agreement is publicly available as a reference document from the CEN Members National Standard Bodies.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and United Kingdom.

1 Foreword¹

This CEN Workshop Agreement has been drafted and approved by a Workshop of representatives of interested parties on 2012-XX-XX, the constitution of which was supported by CEN following the public call for participation made on 2010-XX-XX.

The formal process followed by the Workshop in the development of the CEN Workshop Agreement has been endorsed by the National Members of CEN but neither the National Members of CEN nor the CEN Management Centre can be held accountable for the technical content of the CEN Workshop Agreement or possible conflict with standards or legislation. This CEN Workshop Agreement can in no way be held as being an official standard developed by CEN and its members.

The draft CWA was presented and discussed with industry representatives during an Open meeting on 2012-XX-XX, held in Brussels. The public comments period run from 2012-07-03 until 2012-09-02. The CWA's have been officially approved at the final WS/BII2 Plenary Meeting on 2012-XX-XX. The final text of this CWA was submitted to CEN for publication on 2012-XX-XX.

This CWA is part of the set of CWA's that have been prepared by the second CEN Workshop on Business Interoperability Interfaces for Public procurement in Europe (WS/BII2).

The CWA's that were prepared by the workshop are:

- CEN CWA XXXX0: BII Architecture
- CEN CWA XXXX1: BII eNotification
- CEN CWA XXXX2: BII eTendering
- CEN CWA XXXX3: BII eCatalogue
- CEN CWA XXXX4: BII Post Award

The current document is: CEN CWA XXXX1: BII eNotification.

The CEN Workshop on business interoperability interfaces for public procurement in Europe (CEN WS/BII) is established in order to:

- Identify and document the required business interoperability interfaces related to pan-European electronic transactions in public procurement expressed as a set of technical specifications, developed by taking due account of current and emerging UN/CEFACT standards in order to ensure global interoperability
- Coordinate and provide support to pilot projects implementing the technical specifications in order to remove technical barriers preventing interoperability

This CEN Workshop Agreement contains a profile that describes a process for the publication of a Public Procurement notice by an official Publication Body. In some cases, such a notice may not be published but only made available to a monitoring authority. The profile is primarily targeted to the publication of tendering notices, such as a Contract Notice (Call for Tender), in the context of a public tendering process. However, the profile covers any publication process with similar characteristics.

2 Introduction

This profile is a deliverable of the CEN ISSS BII2 workshop.

The original CEN Workshop on **Business Interoperability Interfaces for public procurement in Europe** (CEN ISSS BII) was concluded in December 2009, and its results, including a set of profiles, were issued as **CWA 16073:2010**. The objective of the second phase of the workshop – CEN WS/BII2 – was to provide a framework for interoperability in pan-European electronic procurement transactions, expressed as a set of requirements and technical specifications. The requirements are input into UN/CEFACT and the specifications are compatible with UN/CEFACT in order to ensure global interoperability.

Based on user input the CEN WS/BII2 has reviewed and updated a number of the profiles published as part of CWA 16073:2010. One of the new profiles is profile BII10 that describes the process of publishing notifications on tender procedures, by submitting documents to an official publication body.

2.1 CEN WS/BII2 profiles

A CEN WS/BII2 profile description is a technical specification describing

- the choreography of the business process covered, i.e. a detailed description of the way the business partners collaborate to play their respective roles and share responsibilities to achieve mutually agreed goals with the support of their respective information systems,
- the electronic business transactions exchanged as part of the business process, with their information requirements, and the sequence in which these transactions are exchanged,
- the business rules governing the execution of that business process, as well as any constraints on information elements used in the transaction data models

The profiles focus on the standardization on the organisational and semantics interoperability levels rather than on syntax or technical interoperability levels. Consequently the business transactions within a profile can be structured based on different message standards/syntax as long it can carry all the necessary information elements.

Although the profile descriptions and transaction data models provided by CEN WS/BII2 are neutral of syntax, the workshop also published specifications of how its data models may be mapped to defined syntaxes. This is done in order provide implementable specifications.

The main focus of the profile description and the associated transaction data models is to address generally expressed business requirements, applicable throughout the European market. Although the profile description is designed to meet generally expressed requirements, it is still the responsibility of the users to ensure that the actual business transactions exchanges meets all the legal, fiscal and commercial requirements relevant to their business.

2.2 CEN WS/BII2 Pre award support

The BII workshop has developed a set of profiles to support interoperability in the pre and post award areas. The scope of BII2 is public procurement but the profiles apply as well to private trade since many private customers use tendering as good business practice. In those cases official Notification of calls and contracts is often not applicable.

The scope of BII2 pre award profiles include processes that support communication of qualifications, calls for tender with and without catalogue templates, tenders with and without catalogues and contract notices. During these processes additional information need to be exchanged between Contracting Authorities and economic operators, such as questions and answers and documents supporting a final guarantee. These sub processes are currently out of scope for the workshop.

The set of BII profiles for supporting the pre award area are:

| | <i>Profile</i> | <i>Process</i> | <i>Transactions</i> | <i>Version</i> |
|--------------|---|----------------------|--|----------------|
| BII11 | Qualification | eTendering | Qualification Qualification Reception Notification | BII2 |
| BII12 | Tendering Simple | eTendering | Tender Tender Reception Notification | BII2 |
| BII22 | Call for Tender | eTendering | Call for Tender | BII2 |
| BII10 | Tender Notification | eNotification | Publication Request Notice Publication Response Publication Correction Request Publication Confirmation | BII2 |
| BII34 | Call for Tender with Catalogue Template | eTendering | Call for Tender Pre-award Catalogue Template | BII2 |
| BII35 | Tendering Simple with Catalogue | eTendering | Tender Tender Reception Notification Pre-award catalogue | BII2 |

This profile BII10-Tender Notification is to be used in conjunction with the other pre-award profiles. Where the other profiles describe the communication between a contracting authority and economic operators, this profile BII10 describes the communication between a contracting authority and a publication body. In the other pre-award profiles is described *which* documents need to be published, in this profile is described *how* the publishing process is conducted.

2.3 Implementation, conformance and customization

CEN WS/BII2 profiles define the core functionality that is required in order to achieve interoperability for the business processes that are covered. Parties, claiming conformance to a CEN WS/BII2 profile must be capable of:

- Processing all non-optional transactions that are defined in the profile
- Sending all mandatory elements within the transactions
- Processing all elements within the transactions they receive

Parties may agree bilaterally or within certain communities to extend the core set of information elements, or to adapt their cardinality. This extension mechanism is described in the BII Technical Guideline: BII conformance and customization, which is annexed to CEN CWAxxxx0.

In order to implement a profile, the transactions are to be represented in some syntax. Syntax representation is outside the scope of the profiles; however, the mapping of the profile transactions to UBL 2.0 and to UN/CEFACT has been described. In the profiles, reference is made to technical documents such as XML schemas, Schematron files and example messages to support technical implementation.

Implementations of the profiles may be validated by means of tools and supporting material, as described in the BII Technical Guideline: BII implementation and use of validation artefacts, annexed to CEN CWAxxxx0. More background information and support material can be found on the CEN WS/BII2 website <http://www.cenbii.eu/>.

3 Business environment

3.1 Introduction

Individual Pre awarding processes can be followed using different procedures. In open procedures, economic operators request access to contract documents (including the call for tender). Restricted, negotiated and competitive dialogue procedures require Contracting Authorities to invite the candidates to the tendering process and to send them the contract documents (including the call for tender). Negotiated procedures require sending the invitation to tender to the selected candidates. In all procedures the Call for Tender and/or the awarding needs to be publicly notified, by submitting documents to a publication body.

3.2 Objectives

This profile elaborates the business collaboration use cases for the publication of procurement notices and identifies the business documents related to the notification and publication process.

While the notification process treats a notice in a generic way, the required content of the public procurement notice and appropriate rules for processing are defined by the Public Procurement business domain described by the eTendering profiles.

The use of standardised electronic communication favours

- Consistent use of data fields and terms on all levels (international, supranational, national, regional, local) of notice publication and compliance between corresponding messages.
- Consistency of published data in all journals and gazettes and in all media
- Common understanding of the content
- Minimum set of common parameters for searching and retrieving procurement notices

The business goals for developing and implementing this profile are, thus:

- Process automation
- Automated notice publication
- Ease of publication status tracking
- Message reuse for different purposes and different destinations

The main business benefits to be gained by implementing this profile are:

1. The profile is a basis for an EDI agreement between the parties and enables trading partners to communicate without a previous bi-lateral setup or agreements.
2. The electronic notification allows the Contracting Authority to install a systematic notification process.
3. Electronic delivery of notices enables the Publication Body to automatically process the content and transfer the information into publication.
4. The Contracting Authority can track whether the relevant notice has been formally accepted for publication.

3.3 Scope

This profile supports a process of submitting notifications by a Contracting Authority to a Publication body. It is intended to support transmission of electronic documents for processing in semi-automated processes by the receiver. The legal requirements that were taken into account are requirements from European legislation, in particular the EU directives, mentioned in section 6 of this profile. The intended scope for this profile is Government to Government (G2G) to support Business to Government (B2G) contracting.

The transactions, specified in this profile are intended to be exchanged between the application systems of Contracting Authorities and Publication bodies. This means that it is expected that the parties have connected their systems to the internet, and that they have middleware in place to enable them to send and receive the transactions in a secure way, using an agreed syntax.

The content model of the transactions can also be used in platforms or portals, so that these platforms are based on the same information and process models, which makes them more interoperable. Even if platforms are not technically interoperable, the content model facilitates understanding the tendering documents and to participate in the publication process.

eNotification refers to the process of notifying procurement stakeholders of a procurement procedure. Generally, this is done by means of an official publication. The messages used in this process, and particularly the actual notice, are prepared and exchanged electronically. The actual publication may be available in an electronic medium as well as on paper.

The process is centred on the notice publisher. This notice publisher may receive the notice directly from the notice originator or from another notice submitter, which may be part of a publisher network. He also may submit the notice to another publisher himself. In the context of publication dissemination, the publisher may also provide processed publication information to other service providers such as information brokers, using the data to provide specific (value added) data services. The publisher may also exchange information with other official authorities for the purpose of, e.g., public market supervision or statistics.

While the basic role of the publisher may apply to any newspaper, other roles and functions are often restricted to official gazettes. These gazettes are also often responsible to ensure a formal verification of the notices in respect of legislative or other requirements in vigour. Official gazettes may also have the role to receive information exempted from publication (e.g. due to confidential content) used for notification to a supervising authority. I.e. eNotification also covers notification of authorities in the context of public procurement notices, e.g. for transparency and control reasons.

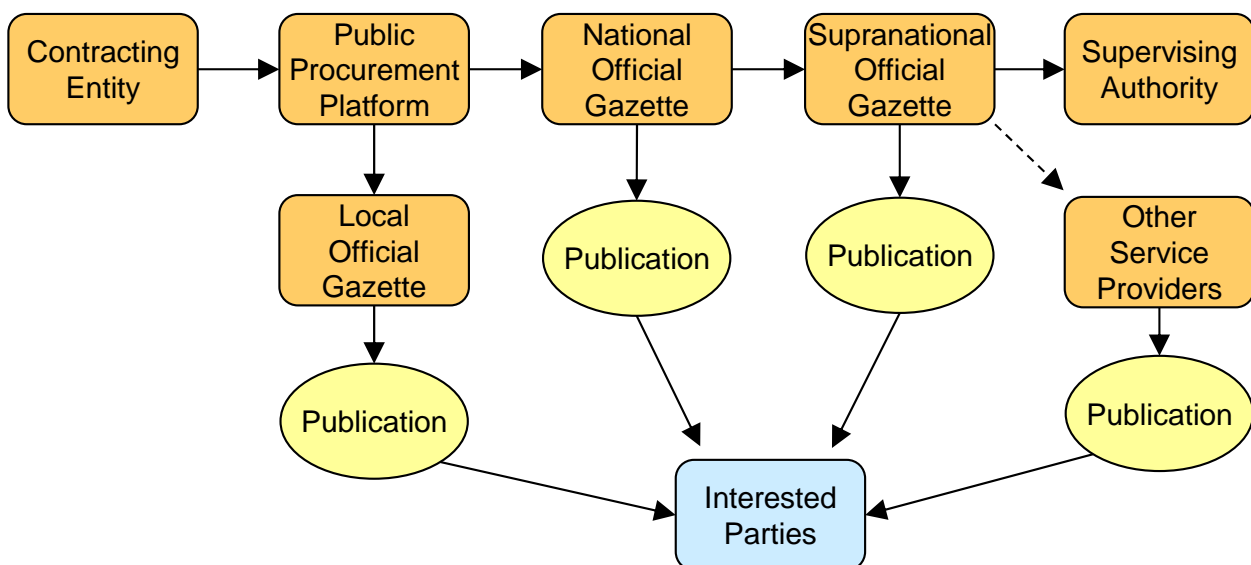

Figure 1: The Publisher may receive the notice not directly by the Contracting Entity, but may receive it by a third-party public procurement platform or by another publisher in an hierarchical or non-hierarchical publication line.

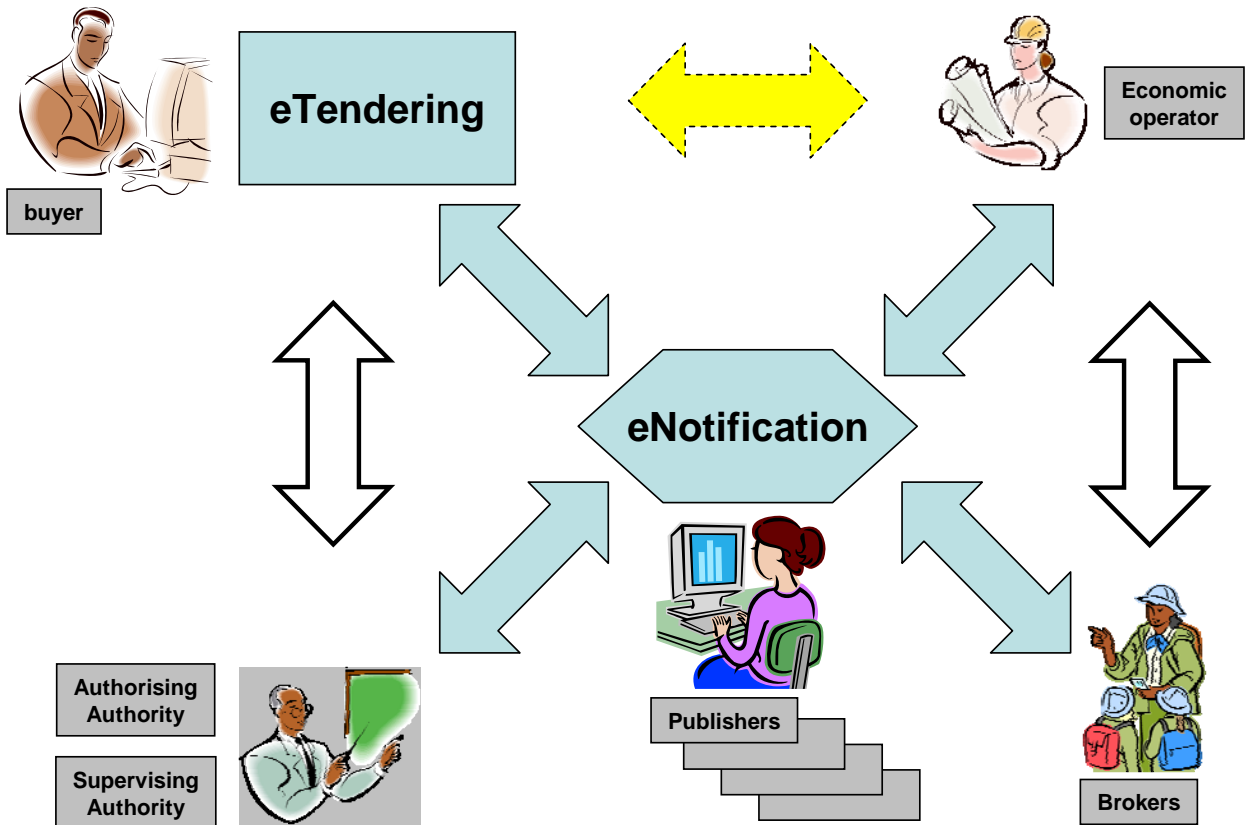

Figure 2: Actors of the eNotification process for Public Procurement and associated processes, In Public Procurement, using public calls for tenders or participation, economic operators are notified via a publisher about a contract to be awarded.

A key aspect of eNotification with regard to a tender procedure is that there is no direct transaction between the purchaser (contracting authority) and an economic operator. The contact between the purchaser and the potentially interested economic operators as stakeholders of the process is created via the publication. All transactions of the process are done between the publisher and other parties,

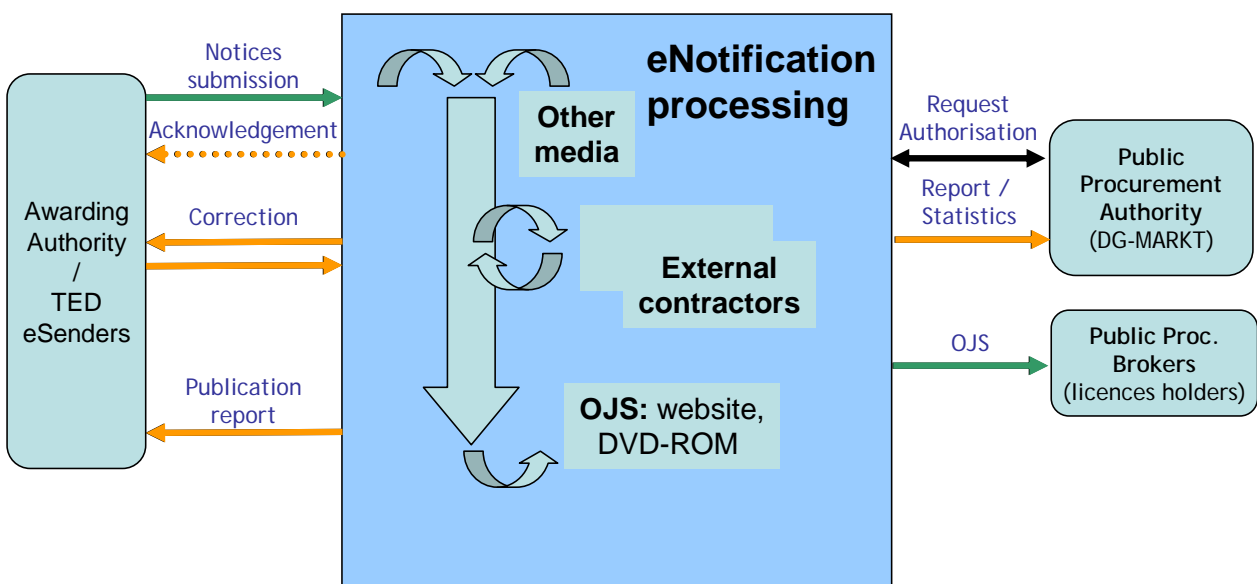

Figure 3: Example of a Public Procurement notification process as established for publication of public procurement notices in the Supplement to the Official Journal of the European Union.

The eNotification profile is therefore addressed to all those exchanging tender notices for publication and further information processing purposes, such as contracting authorities, publishers, print shops, information brokers or monitoring or statistical services.

One of the key aspects is the separation of the message containing the actual notice a part containing the actual notice part and a part describing the message exchange and the notice according to its publication status and the other communication party.

Figure 4: Example of a message containing a Public Procurement notice depending of its publication status.

3.4 Tendering procedures

Article 28 to 34 from Directive 2004/18/EC and article 40 from Directive 2004/17/EC describe the different tendering procedures used by Contracting Authorities. By focusing on the exchange of information steps three abstract process models remain: Open procedure, Restricted procedure and Award of a contract without a prior publication of a contract notice.

The Open procedure

This procedure starts with the publication of a Contract notice. Economic operators have access to the notice and the contract documents. The contract authority provides the Call-For-Tender to all interested economic operators. After preparing the tenders, all economic operators submit their qualification and tender documents. The contracting authority evaluates all tenders and awards the contract to the winning economic operator. The procedure ends by the publication of the Award of a contract.

The Restricted procedure

This procedure starts with the publication of a Contract notice. Economic operators have access to the notice and the contract documents. The contract authority provides the Call-For-Tender to all interested economic operators. Based on the Call-For-Tender all economic operators submit their qualification documents first. The contracting authority evaluates the economic operators and invites only the selected ones to submit their tender. After preparing the tenders, the invited economic operators submit their tender documents. The contracting authority evaluates all tenders and awards the contract to the winning economic operator. The procedure ends by the publication of the Award of a contract.

This process covers the procedures Competitive dialog and Negotiated procedure with a call for competition as well. The actual dialog or negotiation will most likely not be standardized and is therefore not in scope of this model.

Award of a contract without a prior publication of a contract notice

This procedure starts with the invitation to selected economic operators to submit their tenders. The contract authority provides the Call-For-Tender to these economic operators. After preparing the tenders, the invited economic operators submit their qualification and tender documents. The contracting authority evaluates all tenders and awards the contract to the winning economic operator. To provide maximum transparency the contracting authority may publish the Voluntary ex ante transparency notice two weeks before the actual Award of a contract.

This process covers the Negotiated procedure without a call for competition as well. The actual negotiation will most likely not be standardized and is therefore not in scope of this model.

e-Notification

Official notification through publishing bodies is part of all procedures.

4 Requirements

4.5 Process requirements

The process requirements should cover the following information: business transactions between participants, the participant who initiates the activity, the participant who responds and the business conditions that govern the initiation and responses.

1. A Public Purchaser may request the publication of some notice in a information medium, operated by a Publication Body.
2. The Publication Body will confirm the receipt of a document to publish.
3. The Publication Body may request the Public Purchaser to correct the notice if it does not comply to regulations that apply.
4. The Publication Body may itself correct small (e.g. typographic) errors.
5. The Public Purchaser informs the Publication Body on the changes and leaves him a delay to contradict.
6. The Public Purchaser may request the Publication Body to inform him of the status of his notice.
7. The Publication Body informs the Public Purchaser if the document has been published.
8. The Public Purchaser may request the Publication Body to correct or modify a notice that was submitted for publication previously.
9. The Publication Body may modify the notice if the modification request arrives in time and publish the modified notice.
10. The Publication Body may publish the modification as a separate notice if the original notice has already been published or publication cannot be stopped anymore.

4.6 Information requirements

The transaction business requirements for the notices to be included in the request for publication are covered by reference [4] in section 6, defining the paper forms for publishing Public Procurement notices on EU level, and by other forms available on simap.europa.eu, as well as by the corresponding directives [1], [2], [3], [5] describing the information requirements of these forms and also covering the information requirements outlined in [6].

The information requirements, i.e. the key classes of information (Business Entities), the detailed data (attributes) about these Entities that are to be exchanged, and the relation between the Entities for the actual messages of eNotification are detailed in section 4.

5 Profile detailed description

5.1 Business processes in scope

Procurement is a complex domain with several key processes, some of which are illustrated in the following figure.

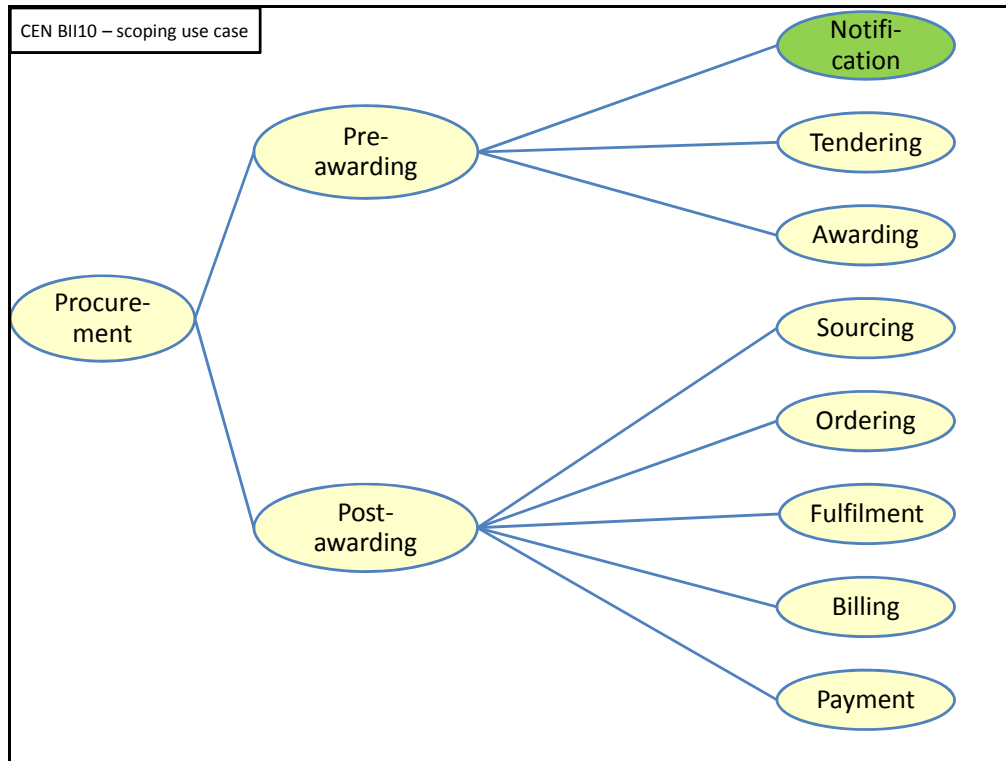

Figure 5: eProcurement processes.

The eNotification profile covers the business processes as highlighted in the above figure.

Notification is an important part of many Tendering procedures. According to various European directives, public calls for tenders and awards of such tenders above certain thresholds must be published in official journals, at the European, national and/or regional level. This BII profile describes the processes for eNotification (published by means of electronic communication) of the tendering documents that need to be published. Which notices are published in an eTendering process is also described in the BII eTendering profiles. An overview is given in the eTendering guideline.

5.2 Roles involved

The following business partners participate in this profile, acting in the roles as defined below.

| Business partners | Description |
|---------------------------|---|
| Governmental Organisation | <p>A State, regional or local authorities, bodies governed by public law, associations formed by one or several of such authorities or one or several of such bodies governed by public law.</p> <p>A 'body governed by public law' means any body:</p> <p>(a) established for the specific purpose of meeting needs in the general interest, not having an industrial or commercial character;</p> <p>(b) having legal personality; and</p> <p>(c) financed, for the most part, by the State, regional or local authorities, or other bodies governed by public law; or subject to management supervision by those bodies; or having an administrative, managerial or supervisory board, more than half of whose members are appointed by the State, regional or local authorities, or by other bodies governed by public law.</p> |

| Party | Role/actor | Description |
|--------------------------------------|-----------------------|---|
| Governmental Organisation | Contracting Authority | The organization that is in demand of a product or service. |
| Governmental or private Organisation | Publication body | A Pan-European, national or regional organisation that publishes Tenders. |

The following diagram links the business processes to the roles performed by the Business Partners.

Figure 6: eNotification roles.

5.3 e-Notification Process

The following diagram shows the choreography of the eNotification process.

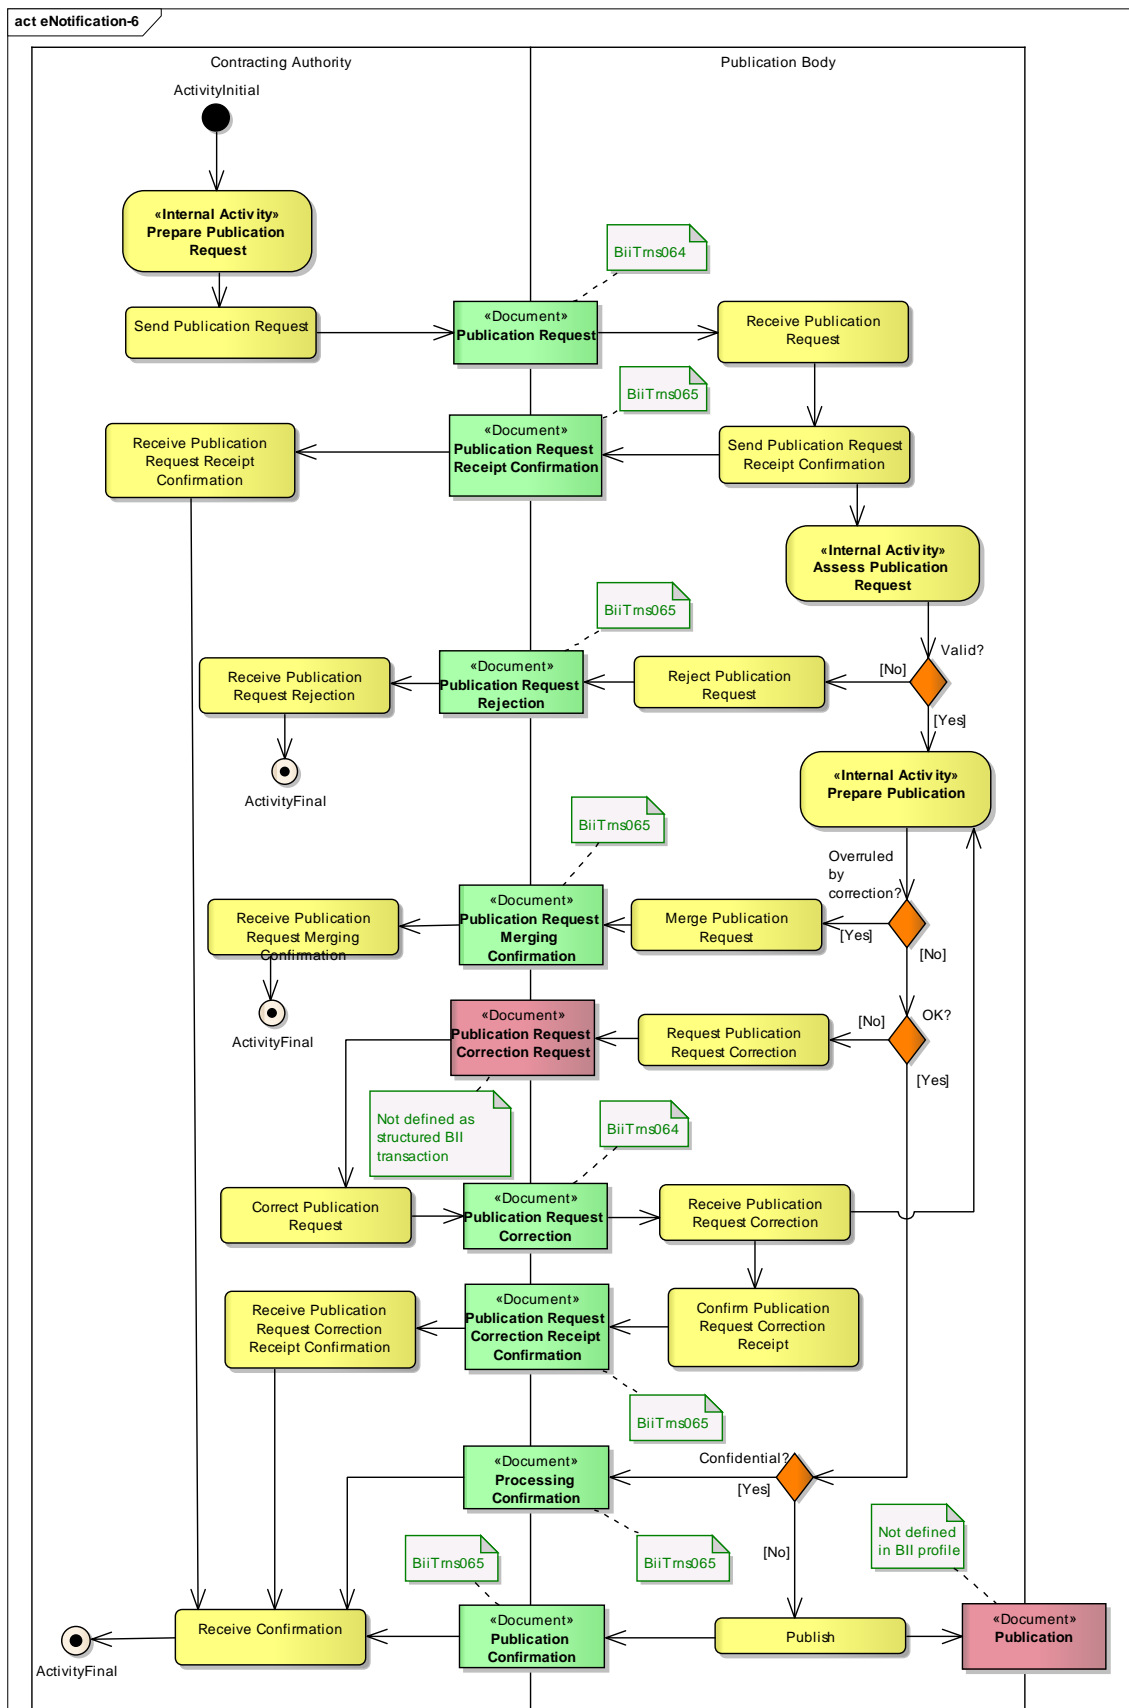

Figure 7: eNotification process.

| Categories | Description and Values |
|-----------------|--|
| Description | <p>The business process involves two organisations in the roles of Contracting Authority and Publication Office.</p> <p>The Contracting Authority starts the process by sending a Publication request to the Publication Body. The Publication Body returns a Receipt confirmation to the Contracting Authority and checks whether the request is valid. The check includes checking completeness, correctness and assessing the legitimacy of the publication.</p> <p>If the request is not valid, the Publication Body sends back a Rejection with the reasons for rejecting the request. If it is valid the Publication Body prepares the publication.</p> <p>During publication preparing it may occur that the Contracting Authority requests the publication of a new document (in another process instance) that overrules the publication of the document that is being prepared. The new document may be a change or correction to the document in preparation. In that case the Publication Body sends a confirmation to the Contracting Authority that the two documents have been merged into one publication.</p> <p>During preparation of the publication the Publication Body may find omissions or errors in the document to be published. It then sends a Correction request to the Contracting Authority and awaits Corrections.</p> <p>The Publication Body also may itself include minor corrections (e.g. correcting typos) before publishing the document. After publication the Contracting Authority is informed.</p> <p>In some cases where confidentiality is at stake, the document is not published.</p> |
| Pre-conditions | <p>A Contracting Authority wants or needs to officially publish a document in the context of a tendering procedure.</p> |
| Post-conditions | <ul style="list-style-type: none"> • The Contracting Authority is informed that the document has been published • The Contracting Authority is informed that the document to be published was not valid • The Contracting Authority is informed that the document to be published is merged with another publication • The Contracting Authority is informed that the document has not been published due to confidentiality |

5.4 Transaction Information requirements

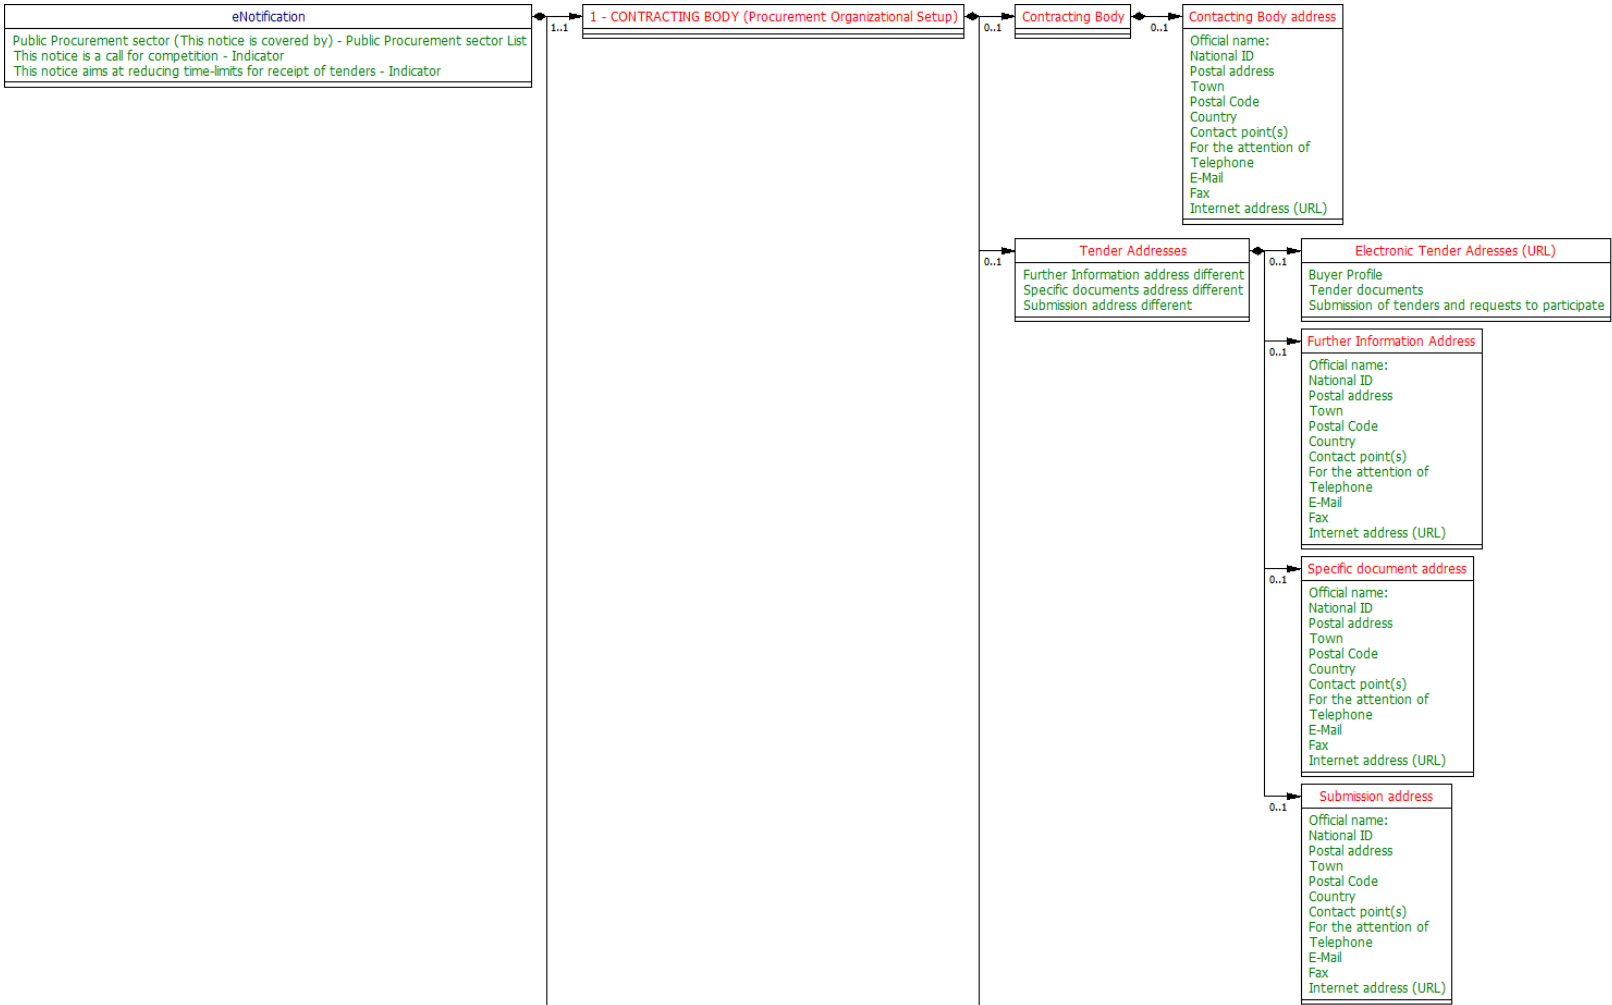

5.4.1 Publication Request

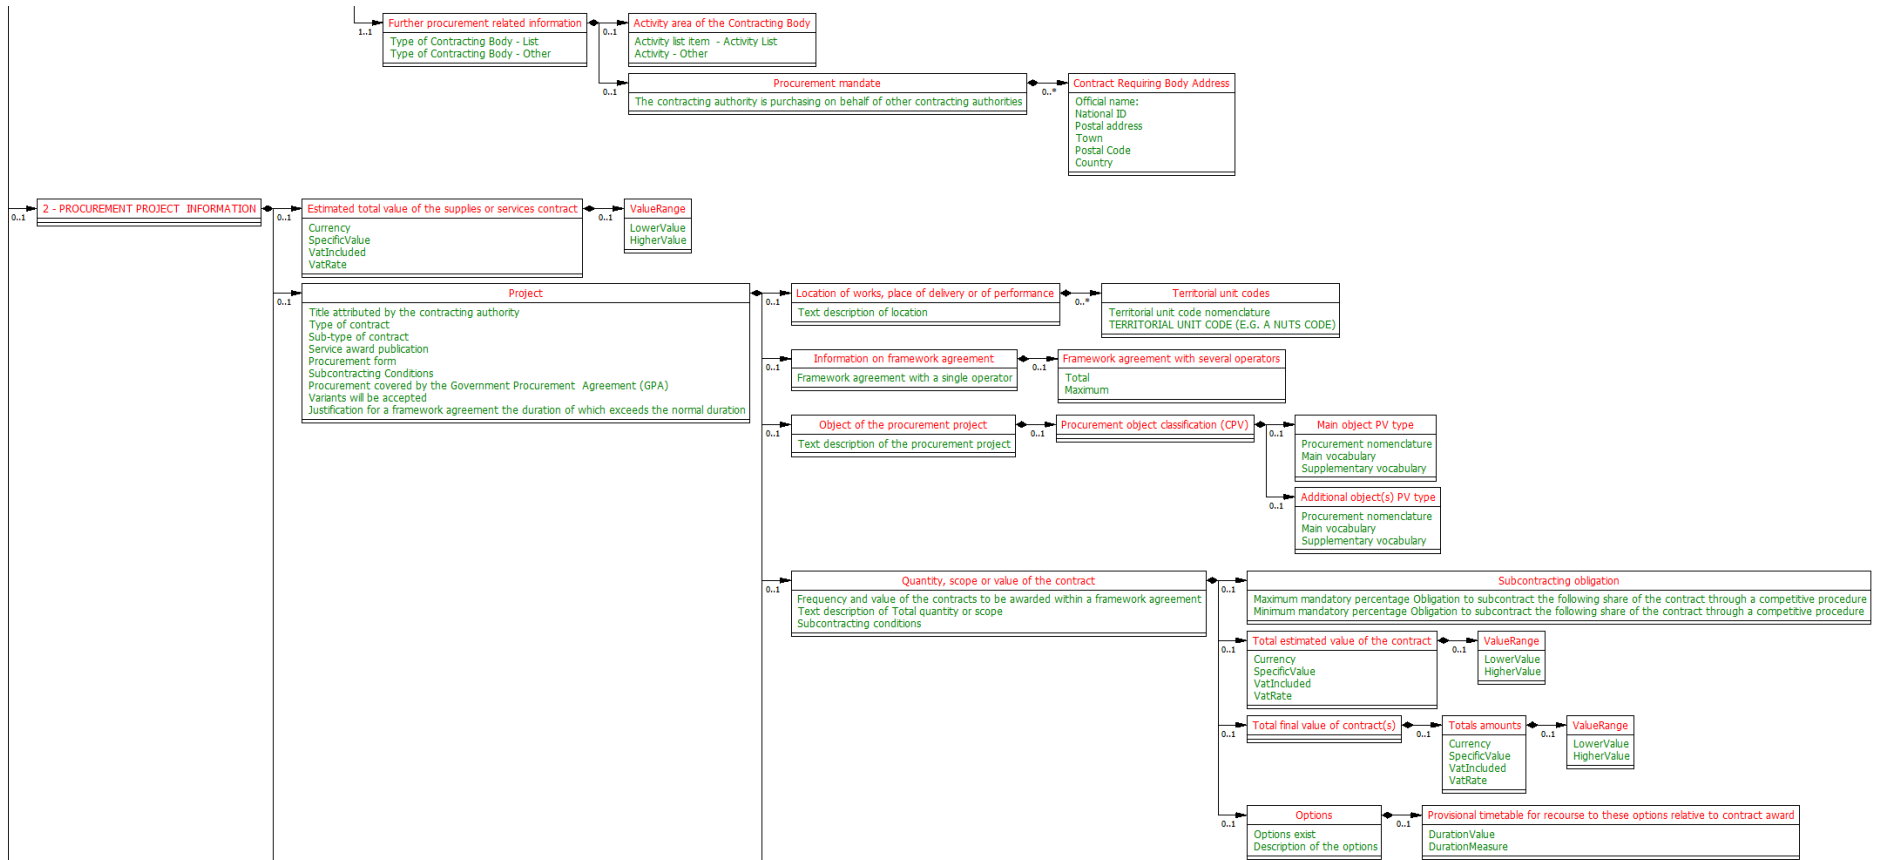

| Categories | Description and Values |
|------------------|---|
| Identifier | BiiTrns064 |
| Description | A request from a contracting authority to a publication body to publish a notification. |
| Partner Types | Governmental Organisation |
| Authorized Roles | Contracting Authority Publication Body |
| Initial Event | Request for Publication |
| Terminal event | Publication request reception |

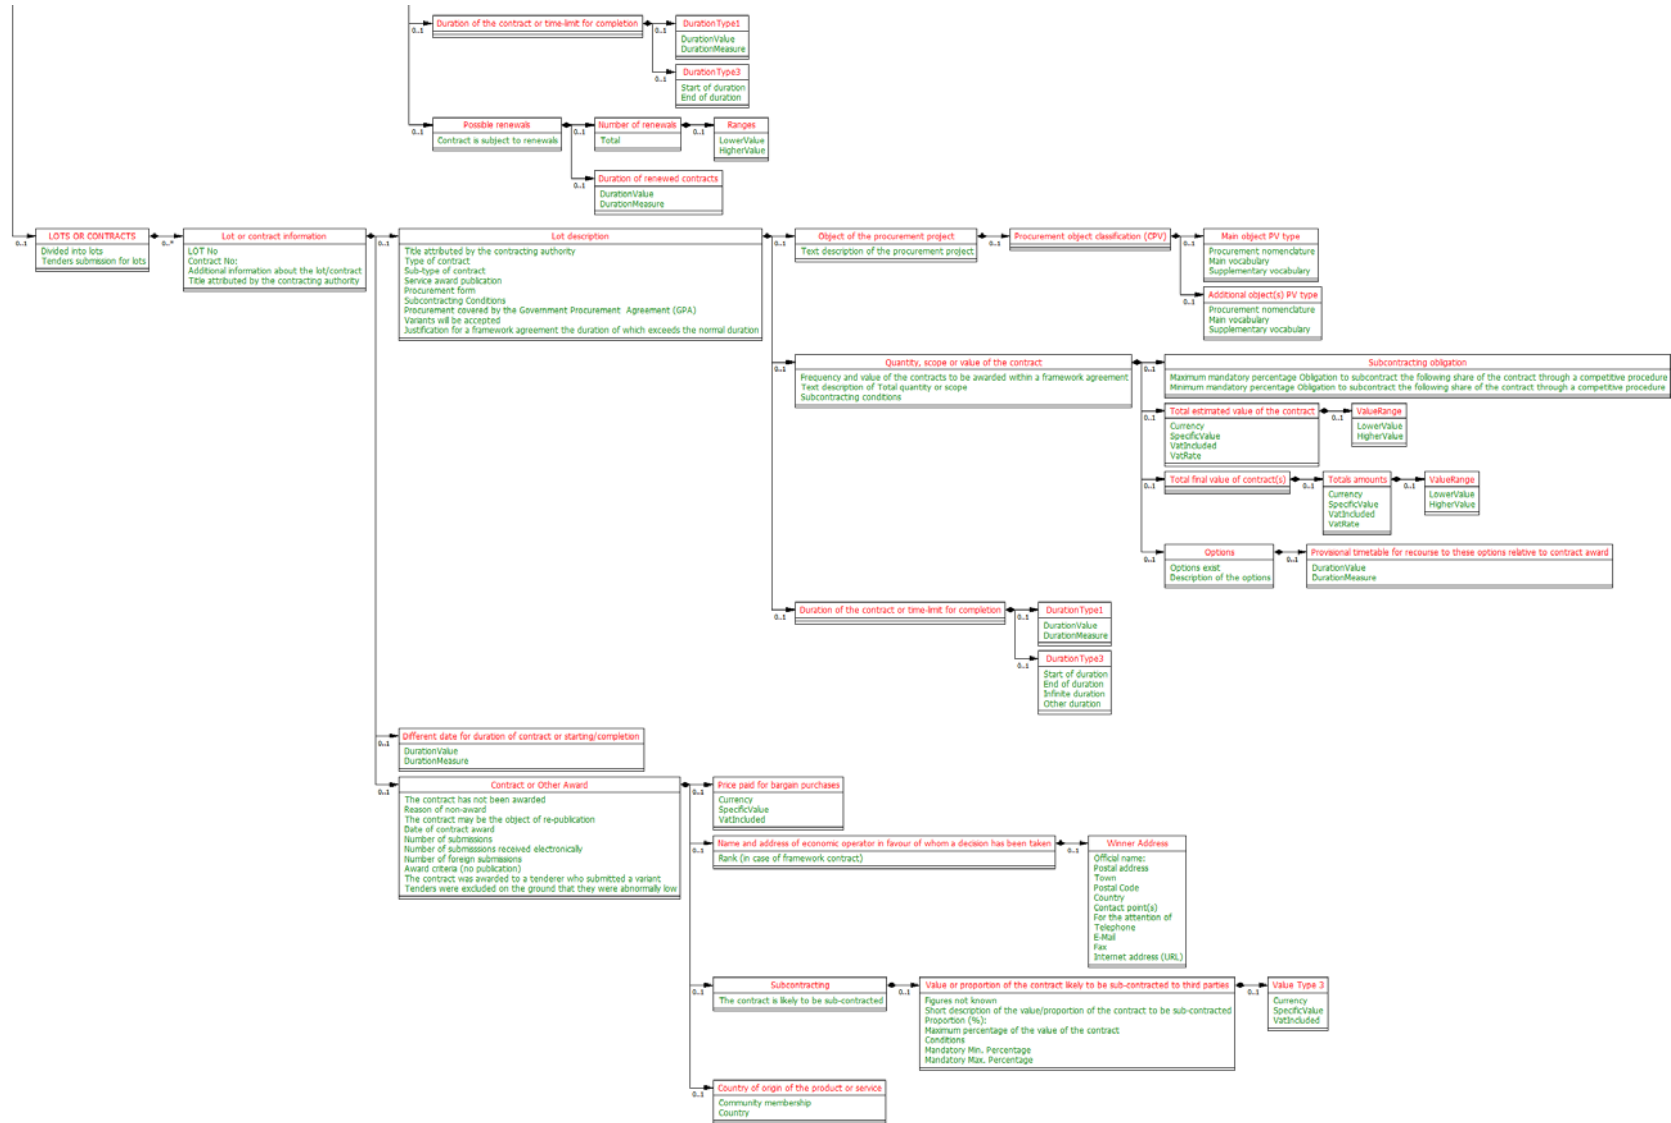

The Publication Request transaction may be used for the publication of several documents, such as the Prior Information Notice, the Contract Notice and the Contract Award Notice.

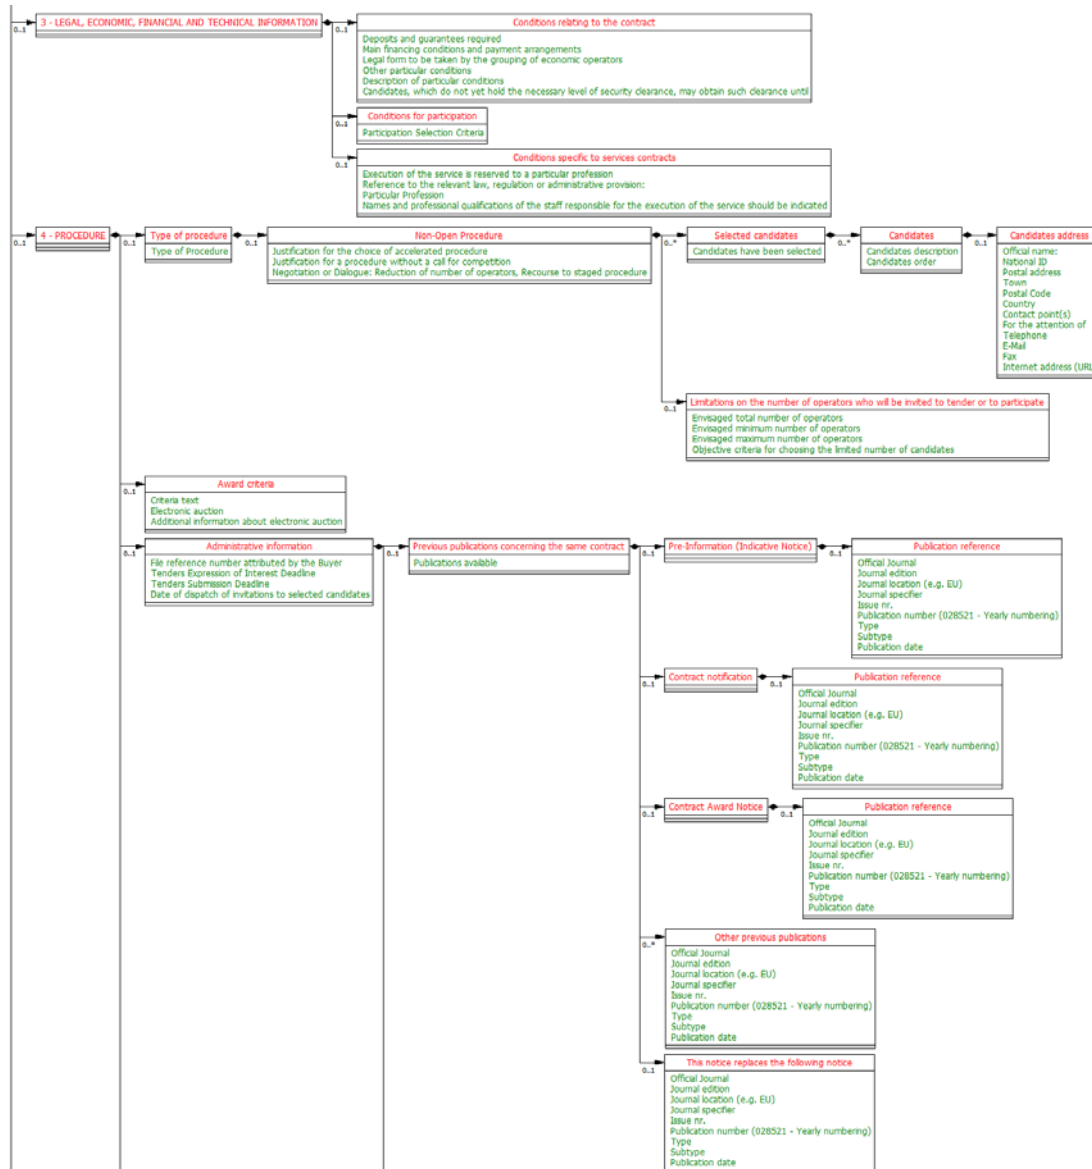

The information requirement models of these documents each are a subset of the requirement model of BiiTrns64-Publication request. The subsets that have been defined are annexed to this CWA.

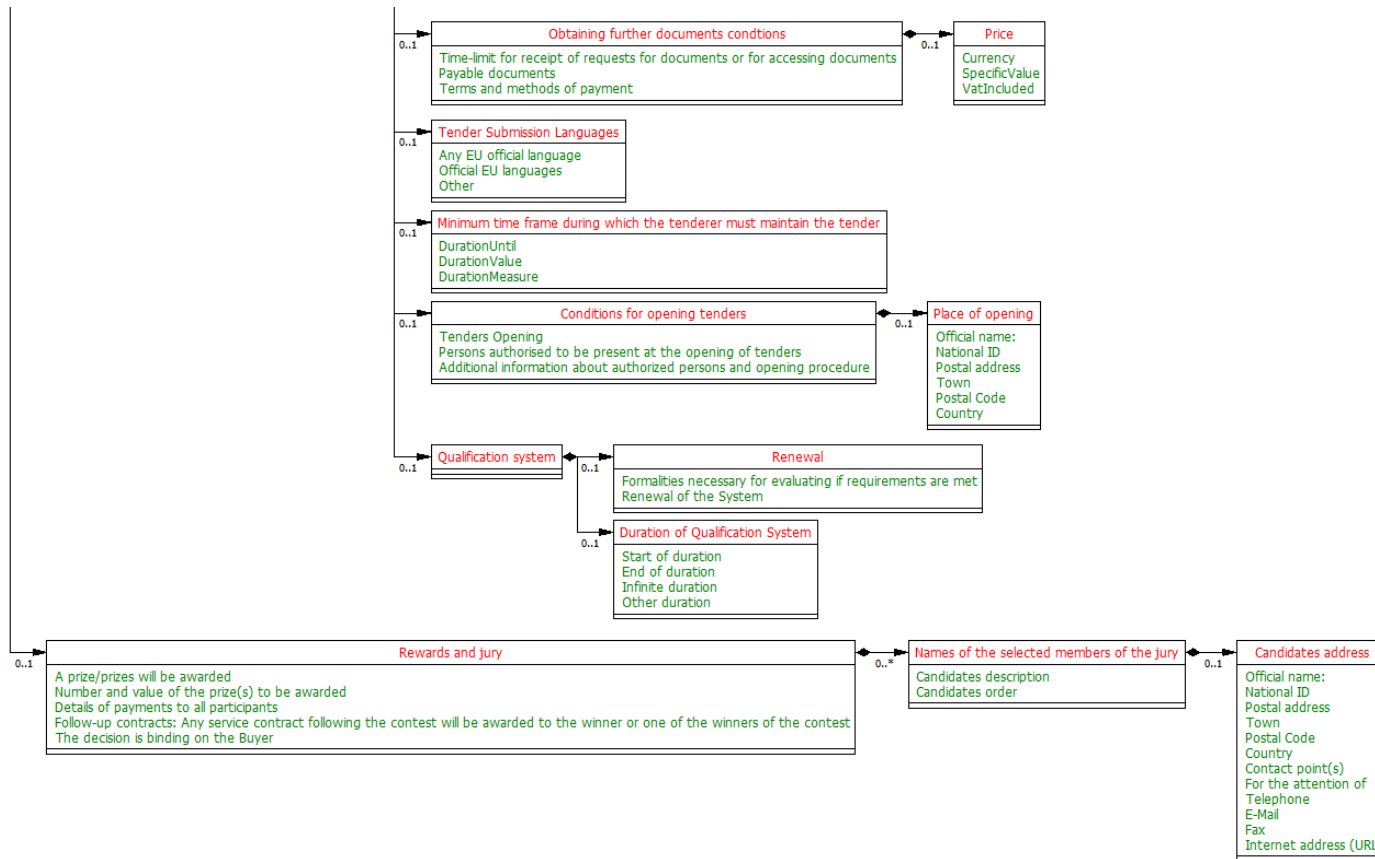

5.4.1.1 Publication Request Transaction Information Requirements Model

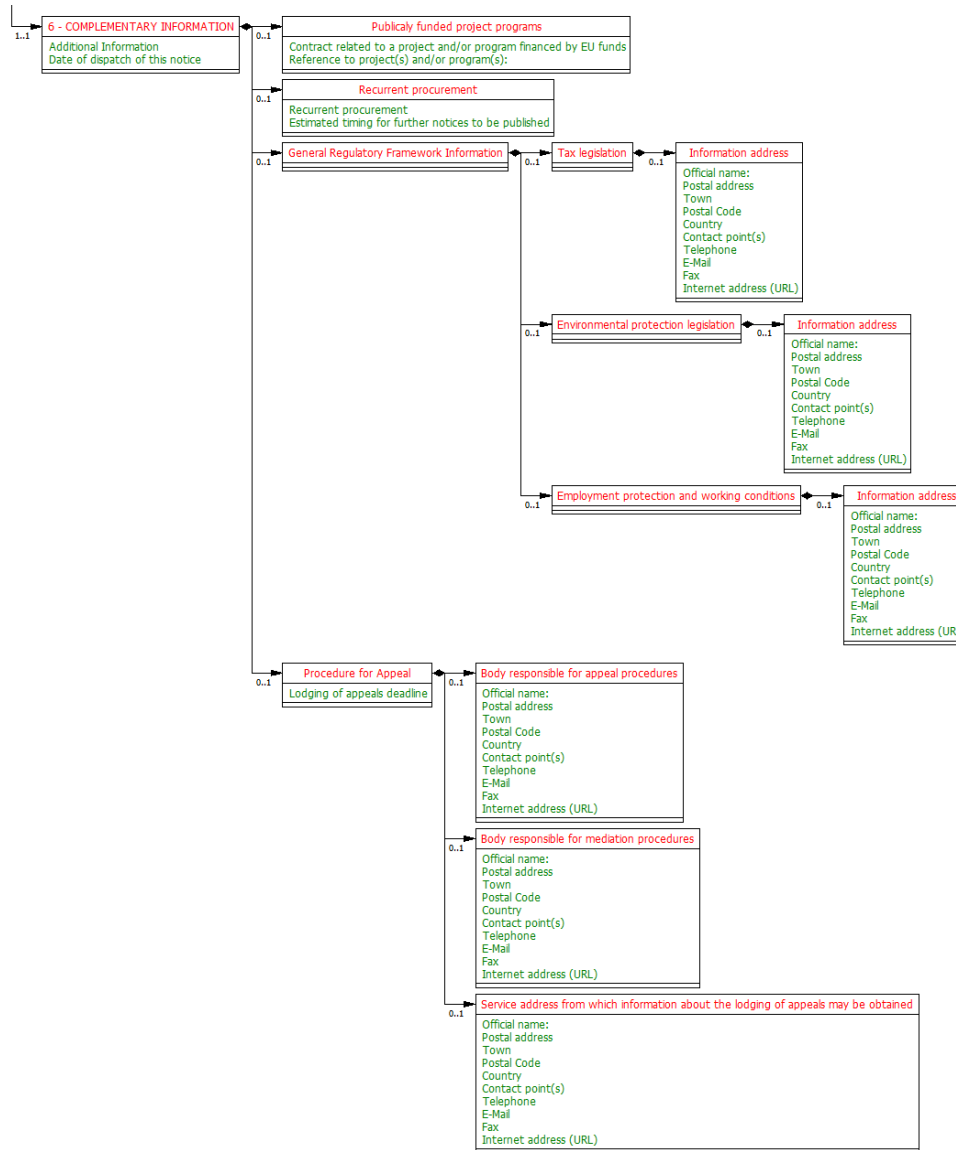

Figure 8: eNotification Transaction Information Requirements model.

5.4.1.2 Publication Request Transaction Information Requirements

| tir64-177 | 0..1 | DurationValue | A numeric value representing the duration. | BiiDT::Text | |
| tir64-178 | 0..1 | DurationMeasure | A code specifying the time measure of the duration (e.g. days, months, years) | BiiDT::Code | |
| | 0..1 | Contract or Other Award | Information about the contract award or other award. | Main::Contract or Other Award | |
| tir64-179 | 0..1 | The contract has not been awarded | indicates, if the tender result for this tendering process is "No one awarded". | BiiDT::Indicator | |
| tir64-180 | 0..1 | Reason of non-award | Textual description of the reason for the tender result | BiiDT::Code | |
| tir64-181 | 0..1 | The contract may be the object of re-publication | | BiiDT::Indicator | |
| tir64-182 | 0..1 | Date of contract award | | BiiDT::Date | |
| tir64-183 | 0..1 | Number of submissions | Number of tender submissions or participants. | BiiDT::Text | |
| tir64-184 | 0..1 | Number of submissions received electronically | Number of tender submissions sent electronically. | BiiDT::Text | |
| tir64-185 | 0..1 | Number of foreign submissions | Number of foreign participants. | BiiDT::Text | |
| tir64-186 | 0..1 | Award criteria (no publication) | A code specifying the contract awarding criteria in the tendering process, such as lowest price or the most economically advantageous tender. | BiiDT::Code | |
| tir64-187 | 0..1 | The contract was awarded to a tenderer who submitted a variant | Indicates, if the contract was awarded to a tenderer who submitted a variant | BiiDT::Indicator | |
| tir64-188 | 0..1 | Tenders were excluded on the ground that they were abnormally low | Indicates, if a tenderer was excluded, because it was abnormally low | BiiDT::Indicator | |
| | 0..1 | Price paid for bargain purchases | Price paid for bargain purchases | Main::ValueType3-Amount | |
| tir64-189 | 0..1 | Currency | | BiiDT::Text | |
| tir64-190 | 0..1 | SpecificValue | | BiiDT::Text | |
| tir64-191 | 0..1 | VatIncluded | | BiiDT::Text | Boolean value MUST be FALSE, FALSE means that amounts are excluding VAT |
| | 0..1 | Name and address of economic operator in favour of whom a decision has been taken | The economic operator in favour of whom a decision has been taken. | Main::Name and address of economic operator in favour of | |

| InfRqID | Crd | Tree and Business term | Usage | Data Type | Note |
|-----------|------|--|---|--|------|
| | | | | whom a decision has been taken | |
| tir64-192 | 0..1 | Rank (in case of framework contract) | An ordinal numeric value. Representing the rank of the award winner. | XSD Data types::string | |
| | 0..1 | Winner Address | The winner's address | Main::AddressType1-Organization | |
| tir64-193 | 0..1 | Official name: | | BiiDT::Text | |
| tir64-194 | 0..1 | Postal address | The main address line in a postal address usually the street name and number. | BiiDT::Text | |
| tir64-195 | 0..1 | Town | The common name of the city where the postal address is. The name is written in full rather than as a code. | BiiDT::Text | |
| tir64-196 | 0..1 | Postal Code | The identifier for an addressable group of properties according to the relevant national postal service, such as a ZIP code or Post Code. | BiiDT::Text | |
| tir64-197 | 0..1 | Country | The country where the address is. The country should always be given by using ISO code 3166 alpha 2 | BiiDT::Text | |
| tir64-198 | 0..1 | Contact point(s) | The name of the contact person. | BiiDT::Text | |
| tir64-199 | 0..1 | For the attention of | | BiiDT::Text | |
| tir64-200 | 0..1 | Telephone | A phone number for the contact person. If the person has a direct number, this is that number. | BiiDT::Text | |
| tir64-201 | 0..1 | E-Mail | The e-mail address for the contact person. If the person has a direct e-mail this is that email. | BiiDT::Text | |
| tir64-202 | 0..1 | Fax | A fax number for the contact persons. | BiiDT::Text | |
| tir64-203 | 0..1 | Internet address (URL) | | BiiDT::Text | |
| | 0..1 | Subcontracting | The actual subcontract information for this tender result. | Main::Subcontracting | |
| tir64-204 | 0..1 | The contract is likely to be sub-contracted | indicates, if a contract is likely to be subcontracted | BiiDT::Indicator | |
| | 0..1 | Value or proportion of the contract likely to be sub-contracted to third parties | Information about the value or proportion of the contract likely to be sub-contracted to third parties | Main::Value or proportion of the contract likely to be sub-contracted to third parties | |
| tir64-205 | 0..1 | Figures not known | Indicates, if no figures are known. | BiiDT::Indicator | |
| tir64-206 | 0..1 | Short description of the value/proportion of the contract to be sub-contracted | A textual description of this subcontracted task rate | BiiDT::Text | |
| tir64-207 | 0..1 | Proportion (%): | A numerical value in percentage indicating a proportion. | BiiDT::Text | |
| tir64-208 | 0..1 | Maximum percentage of the value of the contract | A numerical value in percentage. | BiiDT::Text | |
| tir64-209 | 0..1 | Conditions | Indication of the conditions, the contract is subcontracted and the obligations of the parties involved | BiiDT::Code | |
| tir64-210 | 0..1 | Mandatory Min. Percentage | | BiiDT::Text | |

| InfRqID | Crd | Tree and Business term | Usage | Data Type | Note |
|-----------|------|--|--|--|---|
| tir64-211 | 0..1 | Mandatory Max. Percentage | | BiiDT::Text | |
| | 0..1 | Value Type 3 | The amount assigned by the tenderer to the subcontracted task. | Main::ValueType3-Amount | |
| tir64-212 | 0..1 | Currency | | BiiDT::Text | |
| tir64-213 | 0..1 | SpecificValue | | BiiDT::Text | |
| tir64-214 | 0..1 | VatIncluded | | BiiDT::Text | Boolean value MUST be FALSE, FALSE means that amounts are excluding VAT |
| | 0..1 | Country of origin of the product or service | Country of origin of the product or service | Main::Country of origin of the product or service | |
| tir64-215 | 0..1 | Community membership | Initiates a union the country of origin is part of | BiiDT::Code | |
| tir64-216 | 0..1 | Country | Identifies the country of origin | BiiDT::Text | |
| | 0..1 | 3 - LEGAL, ECONOMIC, FINANCIAL AND TECHNICAL INFORMATION | Conditions related to procurement. | Main::3 - LEGAL, ECONOMIC, FINANCIAL AND TECHNICAL INFORMATION | |
| | 0..1 | Conditions relating to the contract | Contract related conditions covering deposits, guarantees, financial and other requirements. | Main::Conditions relating to the contract | |
| tir64-217 | 0..1 | Deposits and guarantees required | Textual description of the deposits and guarantees required | BiiDT::Text | |
| tir64-218 | 0..1 | Main financing conditions and payment arrangements | Textual description of the financial conditions and payment arrangements | BiiDT::Text | |
| tir64-219 | 0..1 | Legal form to be taken by the grouping of economic operators | Textual description of the legal form to be taken by the grouping of economic operators | BiiDT::Text | |
| tir64-220 | 0..1 | Other particular conditions | Indicates, if there are particular conditions not covered by other fields. | BiiDT::Indicator | |
| tir64-221 | 0..1 | Description of particular conditions | Textual description of particular conditions. | BiiDT::Text | |
| tir64-222 | 0..1 | Candidates, which do not yet hold the necessary level of security clearance, may obtain such clearance until | Indicates the deadline for obtaining the required security level | BiiDT::Date | |
| | 0..1 | Conditions for participation | Conditions for participation in a tender covering qualification and capacity of an economic operator and contract reservation information. | Main::Conditions for participation | |
| tir64-223 | 0..1 | Participation Selection Criteria | Textual description of the general criteria to select participants | BiiDT::Text | |
| | 0..1 | Qualification for the system | Information about qualification conditions and evaluation of these. | Main::Qualification for the system | |
| tir64-224 | 0..1 | Conditions to be fulfilled by economic operators in view of their qualification | Textual description of the conditions regarding the Tenderers qualification | BiiDT::Text | |

| InfRqID | Crd | Tree and Business term | Usage | Data Type | Note |
|-----------|------|--|---|---|------|
| tir64-225 | 0..1 | Methods according to which each of those conditions will be verified | Textual description of the methods to verify the Tenderers qualification | BiiDT::Text | |
| | 0..n | Capacity of Economic Operator | Information about conditions related to the technical and financial capacity of a Tenderer. | Main::Capacity of Economic Operator | |
| tir64-226 | 0..1 | Economic Operatores role | "Economic Operator" or "Subcontractors" Specifies whether the EO is a main contractor or a subcontractor. | BiiDT::Code | |
| tir64-227 | 0..1 | Criteria regarding the personal situation of Economic Operator (that may lead to their rejection) including requirements relating to enrolment on professional or trade registers: Information | Textual description of the personal situation of the economic operators/ subcontractors in this tendering process. | BiiDT::Text | |
| | 0..1 | Economic and financial capacity | Financial capabilities of a tendering organization that can be applied to its business profile. | Main::Capacity | |
| tir64-228 | 0..1 | Information and formalities necessary for evaluating if requirements are met | Textual description of the evidence to be provided for evaluating the fulfillment of the required capacity. | BiiDT::Text | |
| tir64-229 | 0..1 | Minimum level(s) of standards possibly required | Textual description of the minimum level(s) of standards possibly required. | BiiDT::Text | |
| | 0..1 | Technical capacity | Technical capabilities of a tendering organization that can be applied to its business profile. | Main::Capacity | |
| tir64-230 | 0..1 | Information and formalities necessary for evaluating if requirements are met | | BiiDT::Text | |
| tir64-231 | 0..1 | Minimum level(s) of standards possibly required | | BiiDT::Text | |
| | 0..1 | Reserved contract | | Main::Reserved contract | |
| tir64-232 | 0..1 | Reserved contract | Indicates, if the contract is reserved to Tenders fulfilling specific conditions | BiiDT::Indicator | |
| tir64-233 | 0..1 | Contract Reservation Subject | The conditions for reservation of a contract, e.g. restriction of the contract to sheltered workshops or sheltered employment programs. | BiiDT::Code | |
| | 0..1 | Conditions specific to services contracts | | Main::Conditions specific to services contracts | |
| tir64-234 | 0..1 | Execution of the service is reserved to a particular profession | Indicates, if the execution of the service is reserved to a particular profession. | BiiDT::Indicator | |
| tir64-235 | 0..1 | Reference to the relevant law, regulation or administrative provision: | A reference to the law, regulation or administrative provision prescribing the restriction of a contract to a particular profession | BiiDT::Text | |
| tir64-236 | 0..1 | Particular Profession | Textual description of the professions the contract is restricted to. | BiiDT::Text | |
| tir64-237 | 0..1 | Names and professional qualifications of the staff responsible for the execution of the service should be indicated | Indicates, if names and professions of the staff responsible for executin needs to be listed in the Tender. | BiiDT::Indicator | |
| | 0..1 | 4 - PROCEDURE | Information about the procurement procedure covering the type of | Main::4 - | |

| InfRqID | Crd | Tree and Business term | Usage | Data Type | Note |

| | | | procedure, information about awarding and administrative information. | PROCEDURE | |
| | 0..1 | Type of procedure | Information about the type of procedure. | Main::Type of procedure | |
| tir64-238 | 0..1 | Type of Procedure | A code specifying the type of the procedure in (e.g. open, restricted, negotiated ect.) | BiiDT::Code | |
| | 0..1 | Non-Open Procedure | Information for a non-open procedure. | Main::Non-Open Procedure | |
| tir64-239 | 0..1 | Justification for the choice of accelerated procedure | Textual description for a justification for the choice of an accelerated procedure. | BiiDT::Text | |
| tir64-240 | 0..1 | Justification for a procedure without a call for competition | Reasons to justify a procedure without a call for competition, e.g. no tender / no appropriate tender responded to procedure | BiiDT::Code | |
| tir64-241 | 0..1 | Negotiation or Dialogue: Reduction of number of operators, Recourse to staged procedure | CEN/BII 1, CN (Tendering Process. Candidate Reduction_ Constraint): An indicator that states the reduction of the number of operators during the negotiation or dialogue. Indicator for specific negotiated procedures and competitive dialogues that eliminate candidates in steps. | BiiDT::Indicator | |
| | 0..n | Selected candidates | Information about a pre-selection of candidates. | Main::Selected candidates | |
| tir64-242 | 0..1 | Candidates have been selected | Indication, if candidates have already been selected. | BiiDT::Indicator | |
| | 0..n | Candidates | Information about a candidate nominated by the buyer. | Main::Candidates | |
| tir64-243 | 0..1 | Candidates description | Textual description of the candidate. | BiiDT::Text | |
| tir64-244 | 0..1 | Candidates order | An ordinal numeric value. | BiiDT::Text | |
| | 0..1 | Candidates address | The address of the candidate. | Main::AddressType1-Organization | |
| tir64-245 | 0..1 | Official name: | | BiiDT::Text | |
| tir64-246 | 0..1 | National ID | | BiiDT::Text | |
| tir64-247 | 0..1 | Postal address | The main address line in a postal address usually the street name and number. | BiiDT::Text | |
| tir64-248 | 0..1 | Town | The common name of the city where the postal address is. The name is written in full rather than as a code. | BiiDT::Text | |
| tir64-249 | 0..1 | Postal Code | The identifier for an addressable group of properties according to the relevant national postal service, such as a ZIP code or Post Code. | BiiDT::Text | |
| tir64-250 | 0..1 | Country | The country where the address is. The country should always be given by using ISO code 3166 alpha 2 | BiiDT::Text | |
| tir64-251 | 0..1 | Contact point(s) | The name of the contact person. | BiiDT::Text | |
| tir64-252 | 0..1 | For the attention of | | BiiDT::Text | |
| tir64-253 | 0..1 | Telephone | A phone number for the contact person. If the person has a direct number, this is that number. | BiiDT::Text | |
| tir64-254 | 0..1 | E-Mail | The e-mail address for the contact person. If the person has a direct e-mail this is that email. | BiiDT::Text | |

| InfRqID | Crd | Tree and Business term | Usage | Data Type | Note |
|-----------|------|--|---|--|------|
| tir64-255 | 0..1 | - Fax | A fax number for the contact persons. | BiiDT::Text | |
| tir64-256 | 0..1 | - Internet address (URL) | | BiiDT::Text | |
| | 0..1 | - Limitations on the number of operators who will be invited to tender or to participate | | Main::Limitations on the number of operators who will be invited to tender or to participate | |
| tir64-257 | 0..1 | - Envisaged total number of operators | | BiiDT::Text | |
| tir64-258 | 0..1 | - Envisaged minimum number of operators | | BiiDT::Text | |
| tir64-259 | 0..1 | - Envisaged maximum number of operators | CEN/BII 1, CN (Short List. Maximum_Operator): Maximum number of economic operators in this tendering process. | BiiDT::Text | |
| tir64-260 | 0..1 | - Objective criteria for choosing the limited number of candidates | Criteria to select a restricted number of candidates | BiiDT::Text | |
| | 0..1 | - Award criteria | | Main::Award criteria | |
| tir64-261 | 0..1 | - Criteria text | | BiiDT::Text | |
| tir64-262 | 0..1 | - Electronic auction | Indicates, if awarding will be done by electronic auction. | BiiDT::Indicator | |
| tir64-263 | 0..1 | - Additional information about electronic auction | Textual description of the electronic auction (if one is used). | BiiDT::Text | |
| | 0..1 | - Award criteria Type | Information about the type of award. | Main::Award criteria Type | |
| tir64-264 | 0..1 | - Award criteria Type | "Lowest price" or "Most Economical Advantageous Tender" | BiiDT::Code | |
| tir64-265 | 0..1 | - Most economically advantageous tender Criteria | CEN/BII 1, PIN Tendering Process. Awarding_Type): A code specifying the contract awarding criteria in the tendering process, such as lowest price or the most economically advantageous tender. | BiiDT::Text | |
| | 0..n | - Criterion | Information about a criterion. These are used, if Award criteria Type "Most economically advantageous tender Criteria" is chosen. | Main::Criterion | |
| tir64-266 | 0..1 | - Criterion number | A nominal numeric value representing the number of the criterion. | BiiDT::Text | |
| tir64-267 | 0..1 | - Criterion | | BiiDT::Text | |
| tir64-268 | 0..1 | - Weighting | | BiiDT::Text | |
| | 0..1 | - Administrative information | Administrative information about a procurement procedure covering references, deadlines and formalities. | Main::Administrative information | |
| tir64-269 | 0..1 | - File reference number attributed by the Buyer | An identifier that is specified by the buyer and used as file reference. Tenderers may express interest of request to participate (without a submission of a tender) e.g. In a Call for Competition | BiiDT::Text | |
| tir64-270 | 0..1 | - Tenders Expression of Interest Deadline | | XSD Data types:: dateTime | |
| tir64-271 | 0..1 | - Tenders Submission Deadline | | XSD Data types:: dateTime | |
| tir64-272 | 0..1 | - Date of dispatch of invitations to selected candidates | The date, where invitations to selected candidates are dispatched. | BiiDT::Date | |

5.4.2.1 Notice Publication Response Transaction Information Requirements

| InfRqID | Crđ | Tree and Business term | Usage | Data Type | ReqID | Note |
|-----------|------|--------------------------|--|---|-----------|------|
| | | Business response | | | | |
| tir65-001 | 1..1 | Response identifier | An transaction instance must contain an identifier. The identifier enables positive referencing the document instance for various purposes including referencing between transactions that are part of the same process. | BiiDT::Undefined | | |
| tir65-002 | 1..1 | Response issue data | The date on which the transaction instance was issued. | BiiDT::Date | | |
| tir65-003 | 0..1 | Response issue time | The time at which the transaction instance was issued. | BiiDT::Time | | |
| tir65-004 | 0..1 | Response textual notes | Used to make any comments or instructions relevant to the response, including the date that the reported decision becomes effective. | BiiDT::Text | | |
| | 1..1 | Process control | Information about the specification that apply to the transaction. | CENBII common structures::Process control | | |
| tir65-005 | 1..1 | Profile identifier | Identifies the BII profile or business process context in which the transaction appears. | BiiDT::Code | tbr00-001 | |
| tir65-006 | 1..1 | Customization identifier | Identifies the specification of content and rules that apply to the transaction. | BiiDT::Code | tbr00-002 | |
| | 1..1 | Sending party | The party sending the response. | Main::Party | | |
| tir65-007 | 0..1 | Party name | The name of the party sending the response. | BiiDT::Text | | |
| tir65-008 | 0..1 | Party identifier | It should be possible to specify the identifier or identifiers for the party. | BiiDT::Undefined | | |
| tir65-009 | 0..1 | Electronic address | A response may contain the party electronic address. The address can be of any format and the format should be identified in the message. | BiiDT::Identifier | | |
| | 1..1 | Receiving party | The party receiving the response. | Main::Party | | |
| tir65-010 | 0..1 | Party name | The name of the party receiving the response. | BiiDT::Text | | |
| tir65-011 | 0..1 | Party identifier | It should be possible to specify the identifier or identifiers for the party. | BiiDT::Undefined | | |
| tir65-012 | 0..1 | Electronic address | A response may contain the party electronic address. The address can be of any format and the format should be identified in the message. | BiiDT::Identifier | | |
| | 1..1 | Response decision | The business decisions that is reported from the sending party to the receiving party. | Main::Decision | | |
| tir65-013 | 0..1 | Response identifier | Identifies the section (or line) of the document to which the response applies. | BiiDT::Undefined | | |
| tir65-014 | 0..1 | Coded decision | A code for the description of the response to the transaction document. AP= Accepted, RE = Rejected, UN/Cefact 4343 Response type code | BiiDT::Code | | |
| tir65-015 | 0..1 | Decision description | The description of the response to the transaction document. | BiiDT::Text | | |
| | 1..1 | Document reference | References to the busines document that the reported decision applies. | Main::Reference | | |
| tir65-016 | 0..1 | Document identifier | Identifies the document being referred to. | BiiDT::Undefined | | |
| tir65-017 | 0..1 | Document type code | The type of the document being referred to, expressed as a code. | BiiDT::Code | | |

5.4.2.2 Notice Publication Response Transaction Business Rules

Facts

| RuleID | rulenote | target | errorlevel | source | ReqID |
|------------------|---|-----------------|------------|--------|-------|
| BIIRULE-T65-R007 | A notice publication response sending party MUST contain the full name or an identifier | Sending Party | fatal | T65 | |
| BIIRULE-T65-R008 | A notice publication response receiving party MUST contain the full name or an identifier | Receiving Party | fatal | T65 | |

Integrity rules

| RuleID | rulenote | target | errorlevel | source | ReqID |
